

Re-Engineering Real Estate Assessments

Project Title	Re-Engineering Real Estate Assessments
Project Summary	Join the fast paced and innovative REAC team updating how government does business. Put your theoretical business knowledge to practical use by helping us update REAC's flexibility and accountability, streamlining processes, increasing customer service, and improving budget flexibility.
Country	United States

Project Description

The Real Estate Assessment Center's (REAC) mission is to provide and promote the effective use of accurate, timely and reliable information assessing the condition of HUD's portfolio; to provide information to help ensure safe, decent and affordable housing; and to restore the public trust by identifying fraud, abuse and waste of HUD resources.

To shift towards a customer-focused operation and align economic incentives, the REAC is transitioning how its operations are financed from direct Congressional appropriations to a fee-for-service model. The Shared Services team is planning and preparing for changes to REAC's two main assessment business by reviewing and documenting processes, analyzing data and identifying trends, and reaching out to stakeholders to keep them up to date on improvements and the re-engineering of our business. A wide variety of skills and abilities are required. Take a chance and become part of the change!

Required Skills or Interests

Skill(s)
Analytical writing
Data analysis
Data visualization
Design thinking
Economic analysis
Editing and proofreading
